

Using Tech for Social Impact: From Ideas to Actions.

Speaker: Enaikele Omoh Kelvin – Nigerian Advocate for Technology

WHO AM I ?

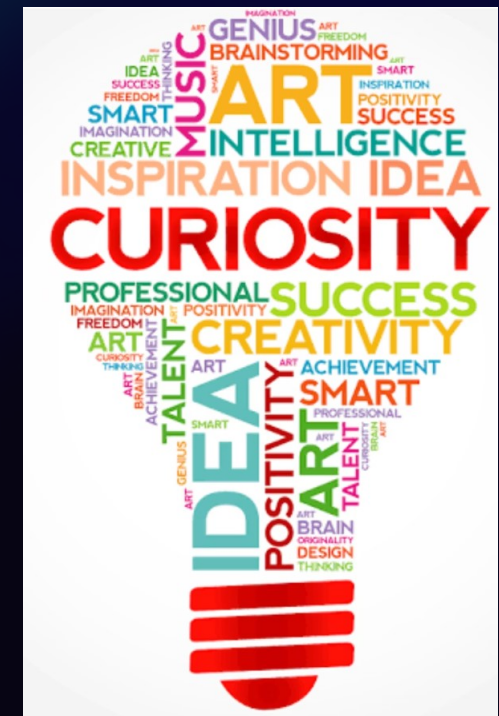

Enaikele Omoh Kelvin is a senior Software engineer, Quantitative developer, and a Technical Writer with 5+ years of experience driving innovation across technology, finance, healthcare, and agriculture. Currently working as the Head of Engineering at ResQ Health Africa and a co-founder of Ricardian Corp, he has also completed his computer science degree at Bells University, having mentored over 500+ students while building transformative solutions that address global challenges.

His professional journey spans multiple high-impact organizations where he has consistently delivered enterprise applications, health-tech platforms, and comprehensive technical documentation, serving thousands of users while maintaining excellence in both development and communication. His entrepreneurial ventures and leadership in global competitions have earned international recognition, establishing him as a dynamic force for sustainable development and social impact.

My Journey: Curiosity, Not Resources

My path began with **curiosity**, not abundant resources. My initial projects were small, but the vision

- Started with curiosity, not resources.
- First projects were small, but the vision was big.
- Learned early that execution beats perfection.

Why This Topic Matters Now

Rapid Evolution

Technology is evolving faster than ever before.

New Rules

AI, blockchain, and mobile tech are rewriting the rules.

Low Barrier

The barrier to entry has never been lower.

Short Window

The window to act and make an impact is short.

AI as a Catalyst for Social Change

Healthcare

Early diagnosis and telemedicine for broader access.

Education

Personalized learning for underserved areas.

Agriculture

Smart farming techniques and accurate weather prediction.

Civic Engagement

Fighting misinformation and improving transparency.

From Idea to Action: A Four-Step Process

01

Identify the Problem

Pinpoint a pressing social issue you care deeply about.

03

Fail Fast, Refine Faster

Embrace failures as learning opportunities for quicker improvement.

02

Start Small, Test Quickly

Begin with manageable steps and iterate rapidly.

04

Build Your Team

Assemble a dedicated team aligned with your vision.

Speed Over Perfection

"Great ideas are everywhere – **execution is rare.**"

Your first version will likely be messy, and that's perfectly fine.

The key is to **build momentum**, which in turn creates credibility and propels your project forward.

The Power of Accelerator Programs

Funding & Mentorship

Access to crucial financial support and expert guidance.

Global Networking

Connect with innovators and leaders worldwide.

Visibility & Credibility

Gain a platform for recognition and trust.

A group of people in a meeting, looking at a large globe. The scene is dimly lit with a teal and blue color palette. The globe is the central focus, and the people are positioned around it, some looking at it and others looking at each other. The overall mood is professional and collaborative.

Your Call to Action

Think of one problem you deeply care about.

Explore how technology can be part of the solution.

Take your first step today — however small.

Closing Thought

"The future belongs to those who **act,
not just those who dream."**

You've got the ideas—now take the actions. Start small: Prototype today, test tomorrow. Join me in this revolution: Use tech for good, act swiftly, learn boldly. Together, we can create waves of change that ripple worldwide.
